## PROJECTS

JUNE 2022 - PRESENT

### Manufacturing Website, – (*MERN Stack*)

- **Technology:** React, NodeJS, MongoDB, Express, Tailwind, React Router, Firebase
- Users can order minimum products and see the orders on my orders page. Users can pay and cancel orders.
- Users can add a review to the review page, and the review will be added to the homepage.
- If a user is an admin they will be able to manage orders, deliver orders, cancel orders, modify tools, etc.
- **Live Site:** <https://tools-manufacturing.web.app/>
- **Git Client:** <https://github.com/Dev-Zual/manufacturere-node-crud-mongo-client-side>
- **Git Server:** <https://github.com/Dev-Zual/manufacturere-node-mongo-crud-server>

MAY 2022 - JUNE 2022

### Warehouse Management Website, – (*MERN Stack*)

- **Technology:** React, NodeJS, MongoDB, Express, Tailwind, React Router, Firebase
- After login, the user will see three more routes: manage items, add items, and my items
- Users can update product stock or deliver products.
- In the “manage items,” route users will be able to delete or restock items.
- **Live Site:** <https://warehouse-management-fe26d.web.app/>
- [Git Client Link](#), [Git Server Link](#)

APRIL 2022 - MAY 2022

### Independent Service Provider Website, – (*React*)

- **Technology:** React, Tailwind, React Router, Firebase
- On the home page click on the enroll button will take the user to the checkout route, this route is private, it redirects the user login page if the user, does not log in.
- This website has a sign-up and log-in system with firebase, user can create a profile or continue with google.
- [Live Site Link](#), [Git Client Link](#), [Git Server Link](#)
